SHOCKING LEVEL OF REPAIRS OUTSTANDING IN ETOBICOKE SCHOOLS

Government data show \$611.8 Million of school disrepair in all 3 Etobicoke ridings, including Premier's

Etobicoke schools still waiting for provincial funding for **over half a billion in outstanding repairs** — impacting HVAC systems, roofs, foundations & drinking water— despite many Ontario MPP's signing a pledge to address this issue in the last election.

PLEDGE SIGNATORIES

ETOBICOKE

Congratulations to some of the many candidates who have pledged to support the creation of a State of Good Renair Standard for Ontario school buildings

The province's own data is compelling — Wedgewood Junior Public School needs \$4.7-M in repairs, Park Lawn Junior Middle School clocks in at \$6.6-M, and Braeburn Junior School \$4-M.

Krista Wylie, co-founder of Fix Our Schools, a non-partisan school advocacy group, warns of the impacts on the health of Ontario students during a critical period when well maintained schools are essential. Wylie's example is compelling: "Braeburn Junior School has so many outstanding repairs that their cost would fund 61% of a brand new school. They include 15 urgent repairs such as HVAC ventilation, heat, wiring & washrooms. Children spend 6+ hours a day in these schools."

Fix Our Schools, an Ontario-wide campaign, approached every candidate running in the 2018 provincial election with a pledge request. They asked candidates to "make a commitment to ensure that our schools are safe, healthy, well-maintained buildings that provide environments conducive to learning and working." This included creating a State of Good Repair Standard by 2022 that would put standards, measurements & metrics in place for school buildings and fund them.

Hundreds of candidates signed the pledge and a full 58 of those signatories became Members of Provincial Parliament. Twenty-three Progressive Conservative MPP's were signatories. In Etobicoke, both MPP Christine Hogarth and MPP Kinga Surma had committed to improve school conditions by bringing them up to an accepted standard by 2022.

Despite the power of a PC majority government, no action has been taken on the development of this standard to date. Schools in Premier Ford's riding need a whopping \$178.4-Million in repairs.

Fix Our Schools has routinely called on the province to fund schools wisely. "Taxpayer dollars are wasted because the government has refused to fund proactive repairs. Every building manager knows that reactive repairs cost more than regular maintenance."

BACKGROUND ON ONTARIO SCHOOL DISREPAIR

Why is a Standard of Good Repair so vital?

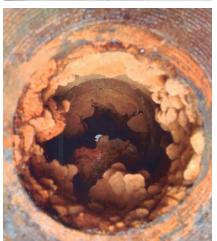

Click for link to Fix Our Schools FAQ

- Increased academic performance and decreased absenteeism
- Increased ventilation because Covid is airborne
- · Removing health issues related to aging buildings will improve the health of students
- · Schools are valuable assets owned by taxpayers that need to be maintained to keep their value
- The lack of crucial technology and stable wi-fi is related to the disrepair backlog
- · School building conditions impact Ontario's economy

The vast majority of outstanding Ontario school repairs are large, vital systems - but small items can still be dangerous

What does a typical school repair list look like?

Lists of urgent repairs typically include all the basics: ventilation (HVAC), heat (hot water boilers), power (electricity transformers), drinking water, structural issues, leaking roofs, and emergency exits.

Wedgewood Junior Public School needs 30 high/urgent repairs
